- (1)Qualitative Information on Consolidated Results of Operations

While the market for prescription pharmaceuticals for the consolidated cumulative third quarter of fiscal 2013 ending March 2013 grew by 2.3% on a year-on-year basis (estimates by Crecon Research & Consulting Inc.), the TOHO Group's pharmaceutical wholesaling operations for the cumulative third quarter showed a growth rate exceeding the average market growth rate, supported by the deployment of a "strategy of balance" between the proposal-based marketing and sales centered on customer support systems and the sales of new products with the potential for market growth in the near future.

In addition, today, while there is an increasing need to strengthen coordination between medical care and nursing care in response to changing medical needs due to the ageing of the society, the development and enhancement of the environment for providing support in the home is considered important. In this situation, many people involved in promoting home medical care have asked us, as a company that has a capillary distribution system for delivery to medical-care facilities, to develop a system for the smooth distribution of medical materials. In response to such requests from various quarters, the Company launched the wholesale distribution of medical materials in small lots on December 1, 2012, in order to deliver medical materials in the quantities needed, when they are needed, on a nationwide scale across Japan.

Under these circumstances, the Company's operating results for the consolidated cumulative third quarter of the fiscal year ending March 2013 recorded 862,368 million yen for net sales (an increase of 3.0% on a year-on-year basis), 10,645 million yen for operating income (an increase of 39.5% on a year-on-year basis), 13,051 million yen for ordinary income (an increase of 23.8% on a year-on-year basis), and 7,852 million yen for net income (an increase of 17.2% on a year-on-year basis).

The outline of operating results by business segment is as follows:

In the pharmaceutical wholesaling operations, the net sales for the consolidated cumulative third quarter of fiscal 2013 were 830,561 million yen, up by 2.8% compared with the same period of the preceding year, supported by the high appreciation by medical institutions of the development of new service-menus and its addition to the Company's unique customer support systems, which the Company has promoted as one of its competitive advantages, as well as active sales promotion that advises immediate prescription for new products with the potential for market growth in the near future. In addition, the Company strictly operated a price lock system to secure appropriate profits based on price systems in accordance with the value of each product, and tackled improvements in relation to distribution problems, including total value transactions and the issue of the gap between the NHI price and the market prices as well as the problem of provisional shipping with the pricing yet to be negotiated. The Company has also promoted the expansion of fee-based businesses resulting from the sufficient use of Meissa and customer support systems, as well as cost reduction activities within the companies of the whole Group. As a result, the segment profits (operating income) were 7,650 million yen, an increase by 92.4% on a year-on-year basis.

In the field of dispensing pharmacy operations, the Company constantly expanded its business scale through setting up new dispensing pharmacies, however, the increased expenses for setting up new pharmacies and employing pharmacists have weighed on profits. As a result, the net sales for the consolidated cumulative third quarter were 59,913 million yen, an increase by 7.1% against the same period of the preceding year and segment profits (operating income) were 3,020 million yen, a decrease by 9.9% on a year-on-year basis.

In the SMO operations, net sales for the third quarter of fiscal 2013 amounted to 270 million yen (a year-on-year increase of 46.5%) and segment income (operating income) was 105 million yen.

In the information equipment sales operations, net sales for the third quarter of fiscal 2013 amounted to 966 million yen (a year-on-year increase of 2.3%) and segment loss (operating loss) was 41 million yen.

(Note) Segment sales include inter-segment transactions.
